

Solar Energy Interactions with Wildlife and Their Habitats

A Summary of Research Results and Priority Questions

Literature Cited

This document contains a full list of the primary sources referenced in the Renewable Energy Wildlife Institute's *Solar Energy Interactions with Wildlife and their Habitats*, which summarizes publicly available information about the adverse impacts of ground-mounted solar photovoltaic power on wildlife in North America and the status of our knowledge regarding how to avoid or minimize these impacts.

Both the *Solar Energy Interactions with Wildlife and their Habitats* and the literature cited are updated regularly to account for the latest published findings in the field of solar energy and wildlife research. The most recent versions can be found at: [link](#).
